SUMMARY

Backend-focused Software Engineering student with end-to-end ownership of an online learning platform. Experienced in APIs, authentication, authorization, payments, data workflows, integrations and automated testing, with enough frontend skill to ship complete product journeys.

EXPERIENCE

IT INTERN | ALTACOM

Nov 2025 - Present

TRI ANH EDU - Online Learning Platform

- Developed the product end-to-end across **26 backend modules** and **78 frontend page files**, covering courses, learning, commerce, payments, exams and admin operations.
- Built backend services with Node.js, Express.js, TypeScript, PostgreSQL and Drizzle ORM for authentication, sessions, roles, courses, enrollments, cart/checkout, payments, vouchers, reviews and learning access.
- Implemented OTP and session management, RBAC, request validation, Redis-backed controls, payment callbacks and database migration tooling.
- Maintained **81 backend test files** and **35 frontend Playwright E2E cases** covering API contracts, payment flows, accessibility errors, mobile overflow, checkout and exam security.

SELECTED PROJECTS

ITSUSUSHI - Restaurant Reservation & Management Platform

Jan 2026 - Present

Solo full-stack project

- Designed and implemented the reservation backend for seat availability, reservation state transitions, payment confirmation and admin approval workflows.
- Supported **2 user roles** across customer and admin journeys, with **5 time slots**, a maximum of **8 seats** per reservation and a **15-minute** payment expiry.
- Implemented JWT access and refresh authentication, protected routes, Zod validation and MongoDB persistence.
- Built the supporting frontend flow across **17 page components** and **7 admin screens** for discovery, reservation, payment and history.
