

TRINH THANH TUNG

BACKEND DEVELOPER • SOFTWARE ENGINEERING

0337675626 | tgtrh0604@gmail.com | Hanoi, Vietnam | github.com/TgTrh06

SUMMARY

Final-year Software Engineering student in a five-year engineering program, focused on backend development with hands-on experience building APIs, authentication, authorization, payments, data workflows, integrations and automated testing for an online learning platform. Currently building Java backend foundations and studying Japanese for opportunities serving the Japanese market.

EXPERIENCE

IT INTERN | KTL

Nov 2025 - Aug 2026

TRI ANH EDUCATION - Online Learning Platform

- Contributed to delivering an online learning platform across **26 backend modules** and **78 frontend page files**, enabling end-to-end journeys for courses, learning, commerce, payments, exams and admin operations.
- Built Node.js, Express.js, TypeScript, PostgreSQL and Drizzle ORM services for authentication, roles, courses, enrollments, checkout, payments, vouchers and learning access, enabling secure core learning-to-payment workflows.
- Implemented OTP, session management, RBAC, request validation, Redis-backed controls, payment callbacks and database migrations to strengthen the security and reliability of critical user and payment flows.
- Maintained **81 backend test files** and **35 frontend Playwright E2E cases**, helping reduce regression risk across API contracts, checkout, payments, accessibility, mobile and exam-security scenarios.

SELECTED PROJECTS

ITSUSUSHI - Restaurant Reservation Platform

Jan 2026 - Present

Solo project | Demo | Repository: ItsuSushi

- Built the reservation backend around seat availability, reservation state transitions, payment confirmation and admin approval, enabling a complete restaurant reservation workflow.
- Designed customer and admin journeys for **2 user roles**, using **5 time slots**, a maximum of **8 seats** per reservation and a **15-minute** payment expiry to enforce booking constraints.
- Implemented JWT access and refresh authentication, protected routes, Zod validation and MongoDB persistence to secure reservation and administrative operations.
- Delivered **17 page components** and **7 admin screens** covering restaurant discovery, reservation, payment and history, providing end-to-end customer and management flows.

TECHNICAL SKILLS

- **Backend:** Node.js, TypeScript, Express.js, REST APIs, Authentication & Authorization (RBAC)
- **Database:** PostgreSQL, MongoDB, Redis, Drizzle ORM
- **Frontend & Testing:** React, Tailwind CSS, Zustand, Playwright
- **Currently developing:** Java backend fundamentals

EDUCATION

ELECTRIC POWER UNIVERSITY

2022 - Present

Engineer in Software Engineering | GPA: 3.34 / 4.0

Expected graduation: Feb 2027

LANGUAGES

- **English:** Intermediate (B1) - Basic communication and technical documentation reading
- **Japanese:** Currently studying JLPT N5 (beginner level)
