

TRINH THANH TUNG

BACKEND DEVELOPER

0337675626 | tgtrh0604@gmail.com | Hanoi, Vietnam | github.com/TgTrh06

SUMMARY

Final-year Software Engineering student with hands-on experience developing and maintaining an LMS / EdTech platform. Built TypeScript, Node.js and Express.js backend services with RESTful API design and integration, OOP principles, PostgreSQL / SQL, authentication and authorization, error handling, API security, payment workflows, Git and automated testing.

EXPERIENCE

IT INTERN | KTL

Nov 2025 - Aug 2026

TRI ANH EDUCATION - LMS / EdTech Platform

- Developed and maintained an LMS / EdTech platform across **26 backend modules** and **78 frontend page files**, supporting courses, learning, commerce, payments, exams and admin operations.
- Designed, built and maintained TypeScript, Node.js and Express.js (ExpressJS) RESTful APIs with PostgreSQL and Drizzle ORM for authentication, roles, courses, enrollments, checkout, payments, vouchers and learning access.
- Applied OOP principles, structured backend modules, coding conventions, error handling, OTP, session management, RBAC, request validation, Redis-backed controls, payment callbacks and database migrations for secure product flows.
- Maintained **81 backend test files** and **35 Playwright E2E cases**, reducing regression risk across RESTful API contracts, checkout, payments, mobile and exam-security scenarios.

SELECTED PROJECTS

ITSUSUSHI - Restaurant Reservation Platform

Jan 2026 - Present

Solo project | Demo | Repository: ItsuSushi

- Built the reservation backend around seat availability, reservation state transitions, payment confirmation and admin approval, enabling a complete restaurant reservation workflow.
- Designed customer and admin journeys for **2 user roles**, using **5 time slots**, a maximum of **8 seats** per reservation and a **15-minute** payment expiry to enforce booking constraints.
- Implemented JWT access and refresh authentication, protected routes, Zod validation and MongoDB persistence to secure reservation and administrative operations.
- Delivered **17 page components** and **7 admin screens** covering restaurant discovery, reservation, payment and history, providing end-to-end customer and management flows.

TECHNICAL SKILLS

- **Backend:** JavaScript, TypeScript, Node.js, Express.js (ExpressJS), RESTful API Design & Integration, OOP
- **API & Security:** Authentication & Authorization (RBAC), Error Handling, Request Validation, API Security
- **Database & Data:** PostgreSQL, SQL, MongoDB, Redis, Drizzle ORM, Database Migrations
- **Engineering Practices:** Git, Automated Testing, E2E Testing (Playwright)
- **Frontend & Domain:** React, Tailwind CSS, Zustand, LMS / EdTech, Payment Integration

EDUCATION

ELECTRIC POWER UNIVERSITY

2022 - Present

Engineer in Software Engineering | GPA: 3.34 / 4.0

Expected graduation: Feb 2027

LANGUAGES

- **English:** B1 assessment at Electric Power University - 9.5/10; technical documentation reading
- **Japanese:** Currently studying JLPT N5 (beginner level)
