

TRINH THANH TUNG

BACKEND DEVELOPER | TRAINEE CANDIDATE

0337675626 | tgtrh0604@gmail.com | Hanoi, Vietnam | DOB: 22 Oct 2004 | Male

SUMMARY

Final-year Software Engineering student in a five-year engineering program, available full-time and onsite. Hands-on experience building and maintaining LMS / EdTech backend services with TypeScript, Node.js, Express.js, RESTful API integration, PostgreSQL / SQL, authentication, authorization and automated testing. Building Java foundations in Core Java, OOP, Collections and Exception Handling.

EXPERIENCE

IT INTERN | KTL

Nov 2025 - Aug 2026

TRI ANH EDUCATION - LMS / EdTech Platform

- Developed and maintained an LMS / EdTech platform across **26 backend modules** and **78 frontend page files**, supporting courses, learning, commerce, payments, exams and admin operations.
- Designed and built TypeScript, Node.js and Express.js RESTful APIs with PostgreSQL and Drizzle ORM for authentication, roles, courses, enrollments, checkout, payments, vouchers and learning access.
- Implemented API integrations and payment callbacks; applied OOP principles, structured backend modules, coding conventions, error handling, OTP, session management, RBAC, request validation, Redis-backed controls and database migrations.
- Maintained **81 backend test files** and **35 Playwright E2E cases**, reducing regression risk across RESTful API contracts, checkout, payments, mobile and exam-security scenarios.

SELECTED PROJECTS

ITSUSUSHI - Restaurant Reservation Platform

Jan 2026 - Present

Solo project | Demo | Repository: ItsuSushi

- Built the reservation backend around seat availability, reservation state transitions, payment confirmation and admin approval, enabling a complete restaurant reservation workflow.
- Designed customer and admin journeys for **2 user roles**, using **5 time slots**, a maximum of **8 seats** per reservation and a **15-minute** payment expiry to enforce booking constraints.
- Implemented JWT access and refresh authentication, protected routes, Zod validation and MongoDB persistence to secure reservation and administrative operations.
- Delivered **17 page components** and **7 admin screens** covering restaurant discovery, reservation, payment and history, providing end-to-end customer and management flows.

TECHNICAL SKILLS

- **Java Foundations:** Core Java, Object-Oriented Programming (OOP), Collections, Exception Handling
- **Backend APIs & Integration:** Node.js, TypeScript, Express.js, RESTful APIs, API Integration, Payment Callbacks
- **Databases:** PostgreSQL / SQL, MongoDB, Redis, Drizzle ORM, Database Migrations
- **Security & Testing:** Authentication & Authorization (RBAC), JWT, Request Validation, Error Handling, Playwright E2E
- **Engineering Practices:** Git, Coding Conventions, Modular Backend Architecture, Automated Testing

EDUCATION

ELECTRIC POWER UNIVERSITY

2022 - Present

Engineer in Software Engineering | GPA: 3.34 / 4.0

Graduation project defense: Jan 2027
Expected graduation: Feb 2027

LANGUAGES

- **English:** B1 assessment at Electric Power University - 9.5/10; technical documentation reading
- **Japanese:** Currently studying JLPT N5 (beginner level)
